SIDER BOOK

Just as the rest of the SIDER Collection, this library is made using the unique combination of several natural elements. The iron sheet rests as the horizontal dimension, combined with thick vertical, rectangular pieces of wood and stone, distancing the plans. Completely customizable in depth, width and height, the vertical elements can be made in an infinite variety of wood or stone or a mix of both materials, sorted according to the customer's wishes. Designed and manufactured in Italy by Vaselli.

DIMENSIONS

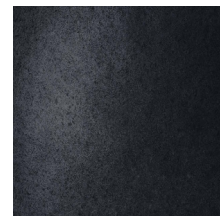

Custom x 40 x Custom H cm | Custom x 15.7 x Custom H in
